# MASSAGE WOOD CHAIR

Wooden furniture Massage Chair, a combination of leisure and massage functions, is the perfect combination of modern furniture technology and traditional massage.

FUJIREJA is a specialty manufacturer and supplier of products that foster personal health and well-being. Established in 2003, we offer an assortment of high-quality massagers and health products that are both innovative and functional, including high-end rocking furniture massage chairs, wooden furniture massage chairs..

Wooden furniture massage chair, suitable for young and middle-aged people with sub-health, and more suitable for the healthy life of elderly friends.

Including the rocking massage chair, a rocking wooden massage chair with both rocking and multiple massage functions is a very good choice for the market, which can play a better role in rest and relaxation.

The chair body with an arc-shaped bottom is designed to have a rocking function. At the same time, multiple massage members with different functions and different structures are set on each part of the chair body to achieve multiple massage functions. It is equipped with Bluetooth to control the audio, which greatly facilitates people's rest and leisure.

Nowadays, people keep working at the desk so that people will become sub-healthy. The so-called sub-health is a critical state, in sub-health. People in the state, although there is no clear disease, there is a decline in mental vitality and adaptability. If this state cannot be corrected in time, it is very easy to cause psychosomatic diseases. Therefore, people need a tool that can go to work and exercise. It is best that people can get a massage to fully relieve the fatigue of the body.

# TOP OEM ODM

Packing Material edge pressure test

Bending resistance test

The simulated 21.5° angle repeatedly bends, respectively, to reach 200,000 and 500,000 times, and the leather does not break.

Massage mechanism noise test

Each massage mechanism needs to pass a noise test before assembly, and the mechanism noise decibel reaches the standard ≤40dB when it is working before it can be assembled on the massage chair.

Transportation vibration, drop test

Paperboard bursting resistance test  
The carton reaches the standard, breaking resistance ≥9kg

Colorfastness test

The surface cotton cloth is loaded with a 22N dry wipe and a wet wipe 20 times at a rate of 1 time per second, and the color fastness is ≥ 4 grades (the highest grade 5 AATCC gray card for comparison)

Wire bending test

According to European Union and Chinese standards, the hoisting weight is 500g, the bending is 5000 times, the bending angle is 90°, and the wire is not broken

Semi & finished products aging test

Hydrolysis resistance test

10% sodium hydroxide (strong alkali) continuously soaks the leather for 24 hours without layering and cracking, imitating the hydrolysis reaction that the leather will encounter for 5 years.
